My research topics are statistics related to graph-structured data. During my thesis, I developed and studied tools for multi-scale graph comparisons based on heat diffusion and topological data analysis. The statistical guarantees obtained on these objects ensure the asymptotic validity of two-sample tests. Implementing these methods allowed me to confront them with more applied problems, particularly in the context of machine learning and neural network classifiers. Now, as a post-doc, I am working on graph inference via compressive learning methods.

Statistics   Graphs   Topological data analysis   Compressive learning

## 🏛️ ACADEMIC POSITIONS

---

2023-   *Post-doc*, ENS de Lyon (LIP) and Inria (Dante).  
On compressive learning and graph data.  
Advisors : Rémi Gribonval and Paulo Gonçalves.

## 🎓 STUDIES

---

2019-2022   *Ph.D*, Université Paris-Saclay and Inria Saclay, France.  
Statistical foundations of topological data analysis for graph-structured data.  
Supervision : Frédéric Chazal and Pascal Massart.

2015-2019   *Ecole Normale Supérieure Paris-Saclay*.

- 2019   *Graduated from ENS Paris Saclay*, France
- 2018   *MSc in Probability and Statistics*, Université Paris-Saclay, France

2012-2015   *Preparatory classes*, Lycée Faidherbe, Lille, France

## “ PUBLICATIONS

---

### Preprints

2021   *Heat diffusion distance processes : a statistically founded method to analyze graph data sets.*  
[arxiv:2109.13213](https://arxiv.org/abs/2109.13213)

## 🏆 AWARDS

---

2021   *Winner of a Math-Company challenge (AMIES)*. With O. Hacquard and V. Lebovici.  
Reconstruction of trajectories from noisy real life 3D detection of people.  
[Challenge AMIES](#)

- Nov. 2022 **Work group of the Probability-Statistics team**, LMO, Orsay.  
Testing SBM vs Erdős-Renyi, [\[article\]](#). With Leonardo Martins-Bianco and [Zacharie Naulet](#).
- June 2022 **Journées de Statistique de la SFdS**, Lyon, France.  
Analyse statistique de graphes, via des processus de diffusion de la chaleur.
- June 2022 **Machine Learning and Signal Processing Seminar**, ENS, Lyon.  
Heat diffusion distance processes for graphs and their application to distribution shift detection.
- June 2022 **Celeste team's seminar**, LMO, Orsay.  
Heat diffusion distance processes for graphs and their application to distribution shift detection.
- May 2022 **Work group of the Probability-Statistics team**, LMO, Orsay, France.  
Presenting *Density estimation from unweighted k-nearest neighbor graphs*, [\[article\]](#).  
With [Alice Contat](#) and [Nicolas Curien](#).
- May 2022 **Datashape team seminar**, Porquerolles, France.  
Detecting distribution shifts using activation graphs from neural networks
- Mar. 2022 **Work group of the Probability-Statistics team**, LMO, Orsay, France.  
Presenting *Identifying the deviator*. [arxiv:2203.03744](#)
- Dec. 2021 **Forum des Jeunes Mathématicien.ne.s**, Besançon, France.  
*Statistical analysis of graph structured data, via heat diffusion processes.*
- Oct. 2021 **Colloque Jeunes Probabilistes et Statisticiens**, Ile d'Oléron, France  
*Statistical analysis of graph structured data, via heat diffusion processes.*
- Oct. 2021 **Work group of the Probability-Statistics team**, LMO, Orsay, France.  
Presenting *Finding Adam in random growing trees*. [arxiv:1411.3317](#)
- Oct. 2021 **Datashape seminar**, INRIA Saclay, France.  
*Statistical analysis of graph structured data, via heat diffusion processes.*
- Mar. 2021 **Vulgarization seminar for Ph.D. students**, Université Paris-Saclay, France.  
*Gaussian approximations for random functions.*

## RESEARCH EXPERIENCE

- October 2018 | **Pre-doctoral Year, EPFL, Lausanne, Switzerland.**  
-July 2019  
 > Probabilistic and statistical studies of topological features for random graph analysis, in the context of Neuro-science.  
 @ [kathryn.hess@epfl.ch](mailto:kathryn.hess@epfl.ch)
- April 2018 | **Master internship, INRIA-SACLAY, Palaiseau, France**  
-July 2018  
 > Development of anomaly detection methods based on tools and features from topological data analysis.  
 @ [frederic.chazal@inria.fr](mailto:frederic.chazal@inria.fr)
- April 2017 | **Master (1st year) internship, SIMON FRASER UNIVERSITY, Vancouver, Canada**  
-July 2017  
 > Bio-Informatics : unsupervised clustering on tuberculosis genomic data.  
 @ [cedric.chauve@sfu.ca](mailto:cedric.chauve@sfu.ca) @ [leonid@sfu.ca](mailto:leonid@sfu.ca)
- January 2016 | **Internship, ENS PARIS-SACLAY, Cachan, France**  
-June 2016  
 > Numerical Hydrology : modeling water flow on elevation grids.  
 @ [moreljeanmichel@gmail.com](mailto:moreljeanmichel@gmail.com) @ [marc.lebrun.ik@gmail.com](mailto:marc.lebrun.ik@gmail.com)

### At IUT d'Orsay

- 2019-2022 *Modélisation* (linear algebra, diagonalization, Python practicals)
- 2020-2022 *Probabilités/Statistiques* (usual discrete and continuous distributions, approximation theorems, central limit theorem, estimators, statistical tests)
- 2019-2020 *Mathématiques Discrètes* (logic, linear algebra basics)

### Others

- January 2021 *Scientific mediation*, with la Maison d'Initiation et de Sensibilisation aux Sciences. Construction and animation of "science/society" debate sessions for high-school students.
- 2017-2018 *Mentoring*, three students from the Villebon-Charpak institute, Orsay, France.

## SKILLS

---

### Code and IT

- > Python Github R
- > GUDHI (Python library for TDA)
- > LaTeX ipe

### Languages

French	●	●	●	●	●
English	●	●	●	●	○
German	●	○	○	○	○

## INTERESTS

---

- > Climbing
- > Hiking, skiing, paragliding.
- > Music, photography.
